

A HOVR ACCOUNT PROFILE BUILT FOR ANNUAL REPORTING CYCLES

Every client property in one table. Valued in a few clicks, year after year.

Firms that value the same client properties every reporting cycle spend most of the effort on data entry, not on judgement. The hovr Auditor profile removes that. Load the portfolio once, see the whole book in a single table, and order valuations by selecting the properties you need — then do it again next year without re-entering a thing.

01 From client list to completed valuation

- | | | | |
|---|--|--|---|
| <div style="text-align: center; margin-bottom: 10px;"> <div style="background-color: #4a5568; color: white; border-radius: 50%; width: 30px; height: 30px; line-height: 30px; margin: 0 auto;">1</div> <p>Load the portfolio</p> <p>Import your client properties by CSV, or add them one at a time. Either way, it is a one-off.</p> </div> | <div style="text-align: center; margin-bottom: 10px;"> <div style="background-color: #4a5568; color: white; border-radius: 50%; width: 30px; height: 30px; line-height: 30px; margin: 0 auto;">2</div> <p>See the whole book</p> <p>Every client property is presented together in one table, so nothing sits in a separate spreadsheet.</p> </div> | <div style="text-align: center; margin-bottom: 10px;"> <div style="background-color: #4a5568; color: white; border-radius: 50%; width: 30px; height: 30px; line-height: 30px; margin: 0 auto;">3</div> <p>Select and order</p> <p>Choose one property or fifty from the list, follow the prompts, and the order is away.</p> </div> | <div style="text-align: center; margin-bottom: 10px;"> <div style="background-color: #4a5568; color: white; border-radius: 50%; width: 30px; height: 30px; line-height: 30px; margin: 0 auto;">4</div> <p>Collect the reports</p> <p>Valuations arrive as PDFs, emailed to you and stored against the property for later reference.</p> </div> |
|---|--|--|---|

THE PART THAT COMPOUNDS

Next year, the work is already half done

When the next cycle comes around there is nothing to re-enter. Open the table, select the properties that are due, and add them to the order. hovr remembers the data from the previous valuation and carries it into the new one.

Nothing re-keyed

Addresses, client allocation and property details stay on file from one reporting cycle to the next.

Consistent year on year

Each new valuation starts from the record hovr already holds, so the same property is assessed on the same basis.

A whole book in one pass

Select every property that is due and send them together, rather than raising an order per client.

02 What the profile takes off your desk

- | | |
|---|--|
| <ul style="list-style-type: none"> ■ No re-entering addresses. The portfolio is keyed once and reused every cycle. ■ No chasing the client to order. Your firm orders on their behalf, straight from the table. ■ No separate tracking sheet. What is pending, ordered and completed sits in the same view. | <ul style="list-style-type: none"> ■ No scattered PDFs. Every report is emailed and held against the property it belongs to. ■ No order-by-order admin. One selection covers as many properties as you need. ■ No lost history. Prior valuations stay attached to the property record. |
|---|--|

Switching your firm across

Ask us to enable the Auditor profile on your account. We will set it up and walk your team through a CSV import on a live file.
